

Table 7. The  $L_1$  distances between estimators based on current status and complete data in a four-state Markov tracking model with lognormal state waiting time and Weibull censoring time. The estimates are based on a Monte Carlo sample size of 5000; all standard errors were less than 0.0013

	$n = 100$		$n = 200$		$n = 500$		$n = 1000$
